

DS412iE Electric rock bolter

Technical Specification

Make the change

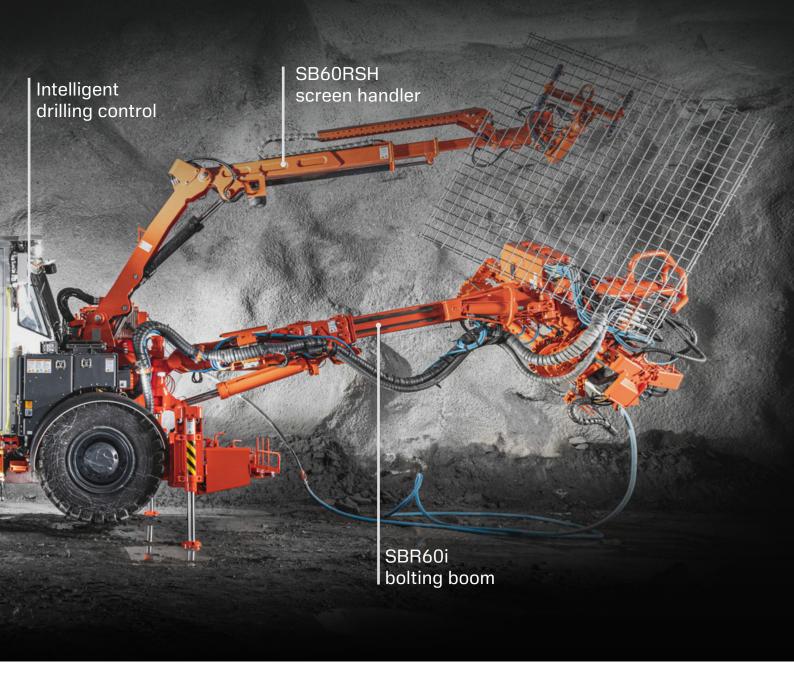

Sandvik DS412iE is a highly automated, productive battery powered bolter for underground mining operations and civil construction tunneling.

The bolter is equipped with an electric driveline system including a battery package and electric motor for zero emissions while tramming. Sandvik DS412iE avoids spreading emissions into the environment, reduces thermal load and thus requirements for ventilation capacity underground.

The i-Class platform offers various levels of automation for rock support drilling as well as a large component commonality through the 400i drill range.

This highly instrumented equipment ensures comprehensive data collection through the entire bolting process for better rock supporting quality in drifts and tunnels.

| Key features | |
|--------------------------------|--|
| Optimum bolting coverage | 4.5 m x 4.5 m |
| Bolt length | From 1.5 m to 3.0 m (5' to 10') |
| Turning width (T-section) | 3 500 mm (corner cut 2 000 x 2 000 mm) |
| Onboard battery package | Lithium iron phosphate battery technology |
| Max. battery energy | 121 kWh |
| Tramming distances | 25 km (flat ground), 5.1 km (1:7 incline upwards) |
| Transport width | 2 615 mm |
| Transport / drilling height | 3 060 mm / 4 960 mm |
| Transport length | 12 950 mm |
| Total weight | 31 000 kg depending on options |

Main benefits

Fast and automated one bolt automation

Sandvik DS412iE is a bolter for 4 x 4 meters size headings combining a safe, ergonomic working environment with high levels of automation.

Equipped with a completely new carrier, a high frequency rock drill, an intelligent control system and an ergonomic cabin, the DS412iE offers high levels of safety and efficiency providing peace of mind for all rock reinforcement operations.

Better effiency

Up to 90%* automatic bolt installation

Improved productivity

Up to 35%* higher penetration rate

Improved tramming distance Up to 50%* more tramming

distance with LFP battery

Upgraded BHi bolting head

With different bolt lengths, it enables wider bolt selection for all customers. Automatic resin shooting and cement mixing system ensure high quality rock reinforcement process.

Increased performance through safest technology

LFP batteries are certified for underground mining applications for maximum safety. Extended tramming performance and shorter charging time are achieved.

Intelligent power management system

The charging of the batteries can be done during normal drilling cycle to ensure maximum tramming energy availability at any time. If needed, energy from batteries can also be used for drilling, offering additional freedom.

Digital Driller™

Through simulation, operators develop skills fully from basic boom movements and manual drilling to full automated drilling operations using various training scenarios.

Sandvik DrillConnect

Readiness for Sandvik DrillConnect mobile application for improved data management and enhanced maintenance, and My Sandvik digital services.

SB60RSH Screen handler upgraded

With its new gripper, the SB60RSH is the perfect tool for the mechanization of wire mesh installation along hanging walls, back walls, and/or side walls.

Sandvik 365 Parts and Services

Proudly keeping you on track!

Sandvik 365 Parts & Services offer a variety of possibilities to enhance your Sandvik DS412iE drill's performance. As an OEM, we provide the best-suited choices to preserve your machine's high performance throughout its lifetime.

These consist of highly skilled service specialists supporting you 365 days a year, all using Sandvik Genuine parts and components complemented by a range of robust tools.

In addition, you get to enjoy the benefits of advanced digital services and a global infrastructure dedicated to keeping your Sandvik fleet on track.
